## Castle Hill practitioner leader in nutrition

Castle Hill dietitian Sue Radd has been awarded the highly-regarded Advanced Accredited Practising Dietitian (AdvAPD) credential by her professional body, the Dietitians Association of Australia (DAA).

The credential is awarded to proactive leaders who use high-level nutrition and dietetic skills to influence the health of the community.

DAA President Liz Kellett congratulated Ms Radd who now joins around 80 other dietitians, or less than two per cent of the DAA membership, who have previously been awarded the AdvAPD credential.

‘This inspiring dietitian is a role model for the profession of nutrition and dietetics and we are pleased to be able to formally recognise Sue for her outstanding professional achievements,’ said Ms Kellett.

‘It is an honour to be awarded the AdvAPD credential as I have always found nutrition and dietetics to be an exciting area to work in, with new scientific learnings every day.

It is also gratifying because you get to see firsthand how your efforts are helping change people’s lives for the better – whether they be a client with diabetes or a dietetic intern’, said Ms Radd.

‘Our AdvAPDs work in diverse areas of practice including private practice, industry, public health, community nutrition and clinical dietetics,’ said Ms Kellett.

Ms Radd is the Founding Director of ‘Nutrition and Wellbeing Clinic’ in Castle Hill, NSW.

**Note to Editors:** The Dietitians Association of Australia (DAA) is the professional body representing dietitians nationally. Accredited Practising Dietitian (APD) is the only national credential recognised by the Australian Government, Medicare, the Department of Veterans Affairs and most private health funds as the quality standard for nutrition and dietetics services in Australia.
